Foreword

Development of a sound information system is critical for successful monitoring and implementation of any programme, particularly in social sectors. Design of a school information system was, therefore, accorded priority from the very beginning of the District Primary Education Programme (DPEP) in 1994, as a result of which the District Information System for Education (DISE) was developed by the National Institute of Educational Planning and Administration (NIEPA).

Importance of an Educational Management Information System (EMIS) was reiterated when *Sarva Shiksha Abhiyan* (SSA) was launched in 2001. SSA guidelines envisage development of a community-owned and transparent EMIS, and preparatory activities of the programme included substantial strengthening of MIS infrastructure in States.

About 539 districts in twenty-five States & UTs have now adopted DISE and it is proposed to cover all districts and completely replace the existing manual system of collection of educational statistics, in so far as elementary education is concerned, in a year or so. Information generated through DISE will then acquire status of official statistics.

The present volumes present the District Report Cards (Volume I & II) on more than four hundred variables for the year 2003-04. Most of the indicators are presented according to school category. Information presented in these volumes is particularly valuable for implementing educational programmes like SSA in the decentralized context. Transition, Completion and Grade-to-Grade Promotion, Repetition and Drop out rates are also being made available for the first time. I am confident that this data will be used in planning provision of good quality elementary education at different levels, and that data users, researchers and development planners interested in the Indian education system will find these volumes useful.

I must take this opportunity to thank UNICEF, Delhi for consistently supporting EMIS activities since 1994, as well as NIEPA, especially Dr. Arun C. Mehta, Fellow, and his team, for bringing out the present publication.

(Kumud Bansal)

Prof. Marmar Mukhopadhyay
Director

From the Director's Desk

I am happy to present *Elementary Education in India: Where do we stand: District Report Cards*, which is based upon the DISE 2004 data. In July last, NIEPA brought out *Elementary Education in India: Where do we stand: Analytical Report 2003* which contains large number of indicators spread over different aspects of universalisation of education. The amount of data that is being disseminated through the present publication is enormous and very rich in contents. The District Report Cards 2004 present a variety of district-specific indicators, many of which are being made available for the first time.

NIEPA is committed to provide professional and technical support to all the States and UTs of the country. We have been conducting workshops on DISE across the country. This has helped in improving the capabilities of both the state and district level MIS officers to a great extent. We plan to further intensify our capacity building activities in the year that follows.

I am confident that all the remaining States and Districts would be covered under DISE in a year or two. This is important in the light of the Government's decision to gradually replace the existing manual system of data collection by the DISE.

I thank the DISE team led by Dr Arun C. Mehta for bringing out the publication, which is of great significance. I hope that the researchers, policy makers, administrators and planners will find the publication informative and useful.

(Marmar Mukhopadhyay)

New Delhi
January 2005

Acknowledgement

For the last several years, NIEPA has been actively involved in strengthening the Educational Management Information System (EMIS) in the country. The year 2004 District Report Cards are based on the data received from twenty five states. The publication presents not only the data up to elementary level but also brings in many new dimensions of elementary education into focus, including data on teachers in terms of their age, academic and professional qualifications, experience and type of in-service training obtained by them. It also incorporates data on children with disabilities, examination results, medium of instruction, students' flow including transition and completion rates, utilization of school development and TLM grants, and many other parameters on which not much information was available so far.

The study of this magnitude cannot be completed without the active involvement and participation of the professionals compared with the implementation of EMIS at the national and sub-national levels. The state level EMIS coordinators, district level programmers & data entry operators, and BRC & CRC coordinators worked for long hours to make sure that the data becomes available at the right time. This publication contains data received at the national level till the end of September 2003. Data generated through the DISE (including the District Report Cards and Analytical Report) in the past has already been made available on the DISE website (<http://www.dpepmis.org>). Efforts are being made to make available full set of the raw data on the website.

I take this opportunity to thank UNICEF, Delhi, for consistently supporting EMIS activities for the last more than nine years. We envisage continued flow of support from the UNICEF in years that follow. In particular, I am thankful to Ms Suzanne Allman for her steady support.

Shri K.M. Acharya, Joint Secretary and Ms Vrinda Sarup, Joint Secretary, Department of Elementary Education & Literacy played a very crucial role in facilitating the implementation of DISE in various states. The contribution of Shri Amit Kaushik, Director (EE & L), who looks after the MIS in the Ministry, is also gratefully acknowledged. He persistently followed the states to ensure that the data collection takes place on time in all the states.

I am thankful to Prof Marmar Mukhopadhyay, Director, NIEPA, for his encouragement. I appreciate the support that I have been receiving from my faculty colleagues from time to time. I thank Shri P. R. R. Nair, Registrar, and his colleagues in the administration for taking care of the administrative part of the DISE project.

The data collection for DISE is undertaken regularly by the state and district level EMIS professionals. Although it is not possible to name each and every individual working at the state and district levels, their contribution is gratefully acknowledged. At the national level, the MIS Unit of the Technical Support Group (ED.CIL) led by Shri M. K. Talukdar, Chief Consultant (MIS) played a significant role in providing technical, professional and administrative support to the states in the implementation of DISE.

The mammoth task of collecting data from 539 districts, meeting day-to-day queries of the EMIS field staff, and providing professional and software support to all the states could not have been possible without the active support from each and every member of the DISE project team located at NIEPA. They provided valuable support in updating the DISE software. The contribution of Shri Naveen Bhatia, Computer Programmer, in database management and supporting the states in technical and professional terms over years is gratefully acknowledged. I am grateful to Dr R. S. Thakur, Consultant who scrutinized the data which helped us in improving quality of the data. Special thanks are due to Shri Shalender Sharma, Project Associate Fellow, for facilitating the preparation and design of District Report Cards. I am also thankful to Ms Alka Mishra and Ms Sangeeta Arora for providing useful assistance.

I hope that this publication will of value for education planners, policy formulators and researchers. Any suggestion for improvement is most welcome.

Report Cards: An Overview

1. Introduction

Ever since its inception, the DPEP has emphasized decentralized planning of education with a focus on district planning. This was again reiterated in the recently launched *Sarva Shiksha Abhiyan* Programme that envisages achieving goal of universal elementary education by 2010. In order to operationalize this premise into reality, considerable amount of educational and allied data is required for each district. It was in this context that the District Information System for Education (DISE) was designed to provide district and sub-district level school data for planning, monitoring and review of various project interventions. The DISE data received from schools are computerized at the district level and disseminated upto the school level in various ways. The data capture formats, definitions and concepts used for data collection are available at <http://www.dpepmis.org> which is being followed uniformly across states.

2. District Report Cards

Since 1999, efforts are being made to share the district level data with the educational planners, administrators and the data users in the form of District Report Cards. In addition to print material, a variety of dissemination strategies, including CDR and web publishing, were adopted in order to improve availability of district level data to the data users. From the year 2001-02, the scope of DISE has been extended to cover new data elements as well as to expand the scope to the whole of the elementary education sector. The present volumes present the District Report Cards (Volume I & II); and contain a comprehensive district-specific database on elementary education in India. The District Report Cards incorporate information on the following important areas of elementary education:

- a) Basic data on population, literacy, sex ratio, number of blocks, villages, clusters and schools from which data is reported.
- b) Key data on elementary education in terms of number of schools, enrolment, and teachers classified by school-category and school management (Government & Private). Details of schools and enrolment in rural areas are also made available category-wise and management-wise.
- c) Grade-wise and level-wise enrolment along with percentage of overage and underage children at primary and upper primary levels of education in each district.
- d) Examination results for the previous academic session for the terminal class at primary and upper primary levels of education.
- e) Classrooms categorized into good condition, requiring minor and major repairs by school category.

- f) Number of schools by category and by type of building.
- g) Distribution of regular and para teachers by educational and professional qualifications and by school category.
- h) Sex-wise enrolment of children with disabilities in primary and upper primary classes.
- i) Gender and caste distribution of regular and para teachers and proportion of teachers undergoing in-service teacher training by school category.
- j) Enrolment by medium of instruction and by school category.
- k) Sex-wise number of students benefited by various incentive schemes at primary and upper primary levels.
- l) Grade-specific promotion, repetition and drop out rates at primary and upper primary levels of education. This has been presented for the districts having atleast 2 years DISE data.
- m) Transition from primary to upper primary level and completion rate at the primary level. Transition rate is presented in case of districts having atleast 2 years data and completion in case of districts having 4/5 years DISE data.
- n) Performance indicators in terms of school category, enrolment distribution: total, Scheduled Castes, Scheduled Tribes, percentage of girls enrolment, classrooms, single teacher schools, schools with attached pre-primary classes etc.
- o) Quality indicators according to category of schools, teacher pupil ratio, average number of teachers, availability of female teachers, blackboards, school buildings, students classroom ratio, common toilets, girls toilets, schools without building and blackboard etc.
- p) Number of schools received school development and teaching learning material grant by school category.

3. Methodology and Sources of Data

The Report Cards are based on the school level data provided by the State Project/Mission Directors to the Department of Elementary Education and Literacy of the MHRD. The data are first cross-checked and validated at the district and then at the state level. After the state is satisfied with the quality and reporting of the data, it is submitted to the national level for analysis, dissemination and reporting to various project management agencies. At the national level thorough scrutiny of state-specific data is undertaken and limitations, if any, are reported back to the states concerned.

In addition to the DISE, the District Report Cards also present selected data from the 2001 Census. The definitions and concepts followed in the preparation of District Report Cards are the same as used in the DISE data capture formats. The MIS Unit at TSG also undertakes processing of data and shares the major findings with the states in the form of tables derived from the state/district level DISE data.

Despite best efforts, some schools have not responded to all the classificatory variables, like management, year of establishment, rural/urban classification, school category, building status, academic and professional qualifications of teachers, caste and sex code for teachers etc. Wherever possible, efforts have been made to analyze the data by excluding the no-response values. In some tables, the no-responses are also shown separately. However, in some cases, the no-responses

are explicit from the tables and hence the totals may not match across various tables due to different number of no-responses. In cross tabulation analysis, the no-responses are excluded.

3.1 Indicators and their formulation

The report cards contain absolute data on selected variables and also present the trends and analysis of indicators derived from the school and the district level data. For the purpose of presentation and ease of understanding and interpretation, certain classificatory variables are regrouped. The following paragraphs provide information on the variables where regrouping has been done for the purpose of presentation in the Report Cards:

- a) *School management*: The District Report Cards present the data on management in terms of Government and Private category. The Government category includes all schools under the management of the Government (Central/State), Tribal/Social Welfare Department, Local Bodies, and Kendriya Vidyalayas, Army Schools, Navodaya Vidyalayas, Sainik Schools, Tibetan Schools, Navy Schools, Project Schools etc. The private category includes schools classified as Private Aided and Private Unaided. It may be noted that the DISE covers only the recognized schools falling under the above categories. Unrecognized schools are not included in the DISE information collection system.
- b) *School buildings*: The classification of schools is also presented in terms of the number of school buildings and their type. Schools having more than one type of building structures are counted under the category of 'Multiple Type Building'.
- c) *Teachers in position*: The analysis of teachers' data is in terms of the teachers shown as 'in position'. The distribution of teachers in terms of educational qualifications has been presented separately for teachers and para teachers. Teachers include TGTs, Head Teachers, Center Head Teachers, regular and temporary primary/elementary teachers, subject teachers such as: Art & Craft Teachers, Oriental Teachers, Language Teachers, Drawing Teachers, Music Teachers, Computer Instructors, Physical Education Teachers etc. Community teachers, voluntary teachers, Guruji, are included amongst para teachers. The analysis of teachers' data for in-service training is presented for the regular teachers. Para teachers have been excluded from this analysis in the Report Cards.
- d) *Medium of instruction*: The District Report Cards present the number of children studying through various mediums of instruction by category of schools. The data for four major mediums of instruction are presented in the Report Cards and if a state/district has more than four mediums of instruction, these have been presented under the category, 'Others'.
- e) *Schools, villages, blocks and clusters*: The number of blocks, villages and schools is based on the initialized entities in the DISE software. The list of blocks, villages and schools is created at the time of DISE implementation and is updated annually. The number of clusters refers to the mapped entities with the blocks. Some states have often reorganized clusters. Towns and municipalities have been classified as separate blocks.

The main indicators presented in the Report Cards have been derived by using the following illustrative formulas. The derivations are given for schools in primary category only. The same method is applied for other categories and classificatory groups.

1. % Single classroom schools = $\frac{\text{Primary schools having single classroom}}{\text{Total primary schools}} \times 100$
2. % Single teacher schools = $\frac{\text{Primary schools with single teacher in position}}{\text{Total primary schools}} \times 100$
3. % Schools with SCR > 60 = $\frac{\text{Primary schools having student classroom ratio > 60}}{\text{Total primary schools}} \times 100$
4. % Schools with pre-primary classes = $\frac{\text{Primary schools having pre-primary classes}}{\text{Total primary schools}} \times 100$
5. % Schools with common toilet = $\frac{\text{Primary schools having common toilet}}{\text{Total primary schools}} \times 100$
6. % Schools with girl's toilet = $\frac{\text{Primary schools having girls toilet}}{\text{Total primary schools}} \times 100$
7. % Enrolment in Government schools = $\frac{\text{Enrolment in primary schools having Education Department, Local Body, Tribal Welfare Department & Others as school management}}{\text{Total enrolment in primary schools}} \times 100$
8. % Enrolment in single teacher schools = $\frac{\text{Enrolment in primary schools having single teacher}}{\text{Enrolment in total number of schools having primary category}} \times 100$
9. % No female teacher schools = $\frac{\text{Primary schools having teacher } \geq 2 \text{ but no female teacher}}{\text{Total primary schools}} \times 100$
10. % Students in schools without building = $\frac{\text{Enrolment in primary schools having no building}}{\text{Enrolment in primary schools}} \times 100$
11. % Students in schools without blackboard = $\frac{\text{Enrolment in primary schools having no blackboard}}{\text{Enrolment in primary schools}} \times 100$
12. % Underage & overage children = $\frac{\text{Enrolment in Grades I-V below '6' & above '11' years}}{\text{Total enrolment in Grades I-V}} \times 100$
13. % SC enrolment = $\frac{\text{Enrolment of SC in primary schools}}{\text{Total enrolment in primary schools}} \times 100$

$$14. \% \text{ SC girls to SC enrolment} = \frac{\text{Enrolment of SC girls in primary schools}}{\text{SC enrolment in primary schools}} \times 100$$

$$15. \% \text{ ST enrolment} = \frac{\text{Enrolment of ST in primary schools}}{\text{Total enrolment in primary schools}} \times 100$$

$$16. \% \text{ ST girls to ST enrolment} = \frac{\text{Enrolment of ST girls in primary schools}}{\text{ST enrolment in primary schools}} \times 100$$

$$17. \text{Pupil Teacher Ratio (PTR)} = \frac{\text{Total enrolment in schools of primary category}}{\text{Total teachers in primary schools category}} \times 100$$

(Para teachers have been included while calculating PTR)

$$18. \text{Student Classroom Ratio (SCR)} = \frac{\text{Total enrolment in primary schools}}{\text{Total classrooms in primary schools}} \times 100$$

$$19. \% \text{ Schools with } \leq 50 \text{ students in Grades I-IV/V} = \frac{\text{Number of primary schools having enrolment } \leq 50 \text{ in Grades I-IV/V}}{\text{Total primary schools}} \times 100$$

$$20. \% \text{ Schools with PTR } \geq 100 = \frac{\text{Total primary schools having PTR } \geq 100}{\text{Total primary schools}} \times 100$$

$$21. \% \text{ Female Teachers} = \frac{\text{Total female teachers in primary schools}}{\text{Total teachers in primary schools}} \times 100$$

(Para teachers have been included while calculating this indicator)

$$22. \% \text{ of Primary schools established since 1995} = \frac{\text{Total primary schools established since 1995}}{\text{Total primary schools}} \times 100$$

(The denominator excludes the schools for which year of establishment is not given)

23. Flow Rates

(a) Promotion Rate

$$\text{Promotion Rate (p}_g^t) = \frac{P_{g+1}^{t+1}}{E_g^t} \times 100$$

where

P_{g+1}^{t+1} = Number of students promoted to grade 'g+1' in year 't+1' and

E_g^t = Total number of students in grade 'g' in year 't'

(b) Repetition Rate

$$(r_g^t) = \frac{R_g^{t+1}}{E_g^t} \times 100$$

where

R_g^{t+1} = Number of repeaters in grade 'g' in year 't+1'

(c) Drop Out Rate

$$(d_g^t) = \frac{D_g^t}{E_g^t} \times 100$$

where

d_g^t = Number of student's dropping out from grade 'g' in year 't'

(d) Transition Rate

$$TR = \frac{E_{g+1}^{t+1}}{E_g^t} \times 100$$

where

E_{g+1}^{t+1} = New entrants in Grade V/VI in year 't+1' and

E_g^t = Enrolment in Grade IV/V in year 't'

24. Gross Enrolment Ratio (GER) = $\frac{\text{Total enrolment in Grades I-IV/V}}{\text{Population of age 6-10/11 years}} \times 100$
25. Net Enrolment Ratio (NER) = $\frac{\text{Enrolment, I-IV/V, 6-10/11 age group}}{\text{Population of age 6-10/11 year}} \times 100$

4. Coverage: Some Facts

- Record date : 30th September 2003
- Grades covered : 1 to 7 or 8 (depending upon the duration of elementary education cycle)
- Total states : 25
- Total districts : 539 (including bifurcated districts)
- Total schools : 9,31,472
- Total students : 143.54 million
- Total teachers : 3.67 million (including para teachers)
- Total para teachers : 2,62,345
- Number of repeaters : 12.21 million
- Number of students with disabilities : 17,58,483

5. Limitations of the Data

The analysis presented in the Report Cards is based on the information received from the State Project Offices and the District Project Offices. Procedures for the data validation and verification of sample data capture formats at the district level have been prescribed, and the districts reported the steps taken by them to ensure quality and reliability of data collection. The DISE software also checks for many internal inconsistencies in the data and generates reports for verification by the District Project Office. The State Project Office while transferring the data from the district to the state database ensures that the data received from the district is complete and free from any inconsistency. At the national level, data from the State Project Office is received to ensure compliance with various quality control measures. Despite these efforts, some inconsistencies and missing data are observed at the national level. In some cases data on key elements is found missing. In view of these problems, the data presented in the Report Cards may not exactly match. In some cases the discrepancies could not be resolved at the national level. Data for such districts is rejected due to gross inconsistencies and the same is not reported in the present publication.

Despite all our efforts, it is possible that the field agencies might have not covered all Navodaya Vidyalayas, Sainik Schools, Military Schools, Kendriya Vidyalayas, Tibetan Schools etc. under DISE. All these schools are recognized schools and are supposed to be covered under DISE but their coverage varies from state to state and district to district. A few states have collected data from these schools while others might not have covered all such schools. Similarly, field level functionaries reported that data from a few private recognized schools couldn't be obtained for one or the other reason. We are trying to reach all such schools through the highest level, and are hopeful that these efforts will be reflected in the year that follows.

For the first time an attempt has been made to present flow rates in case of districts having DISE data for more than two years. While analyzing flow rates it was noticed that in a number of districts the same was found incorrect, largely because of the inconsistent data. Flow rates in case of such districts have not been reported. States are advised to use consistency module of DISE software to identify and remove inconsistencies in the data. In addition, CRC coordinators are being made accountable to ensure that data is consistent and there are no missing values.

One of the other important limitations of the data is incomplete reporting of the school age population, which is very crucial in assessing the progress towards universal elementary education. It has been observed that information received on this aspect through the Village Data Capture Format, in most of the cases, is either incomplete or simply not reported. In the absence of reliable school age population, it is not possible to construct crucial indicators such as GER and NER both at the primary and upper primary levels of education.

The district-specific Census 2001 figures on single-age population are not yet available. Alternatively, the state-specific share of 6-11 and 11-14 year population in total population in 2001 has been applied to total projected population of the district in the current year to obtain district-specific child population and the same has been used to construct GER and NER. Sprague Multipliers were applied to state's actual 2001 age group population to obtain single age population. The GER and NER presented in the present volume should, therefore, be analyzed in the light of these limitations. The estimates are likely to be changed once projections based on actual district-specific Census 2001 figures are available.

Indicators constructed and data presented in this volume are based on the data as has been received from the States & UTs
